

AAPG Bulletin

Index of Volume 81 (1997)*

The format of the 1997 *Bulletin* index consists of titles, authors, and keywords. Beginning at the left, column one references a regular *Bulletin* article (BU) or a *Bulletin* abstract (BA). Column two indicates the volume and issue numbers (8002 = volume 81, issue number 2). Column three gives the page number. Column four indicates whether the entry is by title (T), author (A), or keyword (K). The fifth column is the entry itself. Please note that this index does not show multiple authors in any one listing; each author is listed separately.
